About this report

This report presents the results of a proximity analysis to identify the biodiversity features and species which are located within 25 km and 50 km.

Data used to generate this report

IUCN and UNEP-WCMC, 2017. *The World Database on Protected Areas (WDPA)* [On-line], March 2018.

BirdLife International (on behalf of the KBA Partnership), 2016. *Key Biodiversity Areas: December 2016 version*.

IUCN, 2017. *The IUCN Red List of Threatened Species grid analysis of range maps. Version 2017-3 (December)*.

Limitations

This report provides an indication of the potential biodiversity-related features - protected areas, key biodiversity areas and species - close to the specified location. It provides an early indication of potential biodiversity concerns, and can provide valuable guidance in making decisions. For example, this information can be helpful when assessing the potential environmental risk and impact of a site, categorising investments/projects, preparing the terms of reference for an impact assessment, focusing attention on key species of conservation concern and sites of known conservation value, and reviewing the results of an impact assessment.

The report does not provide details of potential indirect, downstream or cumulative impacts. Furthermore, the report should be regarded as a “ first-step”, providing a set of conservation values sourced from global data sets, and is not a substitute for further investigation and due diligence, especially concerning national and/or local conservation priorities.

For ultimate accuracy, distance calculations are performed by reprojecting the spatial data (as shown through the map viewer) to an equal distance projection, and so may not match precisely the results shown on the map.

Protected Areas and Key Biodiversity Areas

The following sites are found within the selected buffer distances:

Features within 25 km

National-level protected areas		
IUCN Category I-II	Kazbegi	9,293 ha
IUCN Category I-II	Liakhvi	6,565 ha
IUCN Category III-IV	Abano Mineral Lake	0 ha
IUCN Category III-IV	Jvary Pass Travertine	3 ha
IUCN Category III-IV	Keterisi Mineral Vocluse	1 ha
IUCN Category III-IV	Sakhizari cliff	336 ha
IUCN Category III-IV	Travertine of Truso	4 ha
Priority Sites for Biodiversity		
Key Biodiversity Area	Alagirskeye i Kurtatinskoye ravines (Severo-Osetinski (North Osetin) Nature Reserve) endemic, other	133,400 ha
Key Biodiversity Area	Kazbegi endemic	94,889 ha
Key Biodiversity Area	Liakhvi endemic	27,922 ha

Features within 50 km

National-level protected areas		
IUCN Category I-II	Pshav-Khevsureti	75,947 ha
IUCN Category III-IV	Asa	3,949 ha
IUCN Category III-IV	Roshka	119 ha
Priority Sites for Biodiversity		
Key Biodiversity Area	Khevsureti endemic	81,272 ha
Key Biodiversity Area	Shanskoye ravine endemic, other	8,100 ha
Key Biodiversity Area	Valley of Gizel'don river CR/EN	3,000 ha

IUCN RED LIST OF THREATENED SPECIES

Given suitable habitat, the following species are potentially found close to the area of interest:

Taxonomic group	Scientific Name	Common Name	IUCN Red List category
Amphibians	<i>Bufo verrucosissimus</i>	Caucasian Toad	NT
Amphibians	<i>Bufo variabilis</i>	Varying Toad	DD
Amphibians	<i>Hyla arborea</i>	European Tree Frog	LC
Amphibians	<i>Ommatotriton ophryticus</i>	Northern Banded Newt	NT
Amphibians	<i>Pelophylax ridibundus</i>	Marsh Frog	LC
Amphibians	<i>Rana macrocnemis</i>	Brusa Frog	LC
Amphibians	<i>Triturus karelinii</i>	Southern Crested Newt	LC
Birds	<i>Accipiter brevipes</i>	Levant Sparrowhawk	LC
